

How to Build an Excellent Career in Embedded Systems and IoT?

Workshop-1

Jayakumar Balasubramanian
Emertxe Information Technologies,
Bangalore

Introduction

Company Overview

- **About company:** Established in 2003, located in Bangalore
- Focus of the company:
 - Education / Training programs - Entry level engineers, Working professionals and Corporate
 - Project development / Consultancy in areas like Embedded Systems & IoT
- Core team consist of industry veterans in working with companies like HP, Samsung, Huawei and GE
- Highly passionate team to impart knowledge sharing and bridging industry-academia gap
- Accredited with National Skill Development Corporation (NSDC) under Electronics Skill Sector Council of India (ESSCI)

Speaker Profile

- B.Tech (CSE) from NIT, Warangal in 2001
- Started career with Ishoni Networks, HP and Huawei. Worked on core Embedded industry in domains like consumer networking, Printers and Telecom devices
- Involved in all phases of product development from concept to commercial launch
- Played various roles like Technical Leader, Project / Program Manager and Embedded Linux Group manager
- Highly passionate about skill building and contributing to industry-academia gap
- Invited speaker in popular Electronics and EdTech conferences

RESULT: Certification

Workshop-3

Make inform decision.
Remember career choices are for next 30+ years of your life.
Seek mentoring / support

W3: How to build an end-to-end solution in IoT? What skills are required? Connect all the dots

W2: Creating an excellent resume to impress your employer. YOUR resume is YOUR brand

W1: Big picture and getting a view of various career possibilities in Embedded /IoT

Workshop-2

Workshop-1

Current Situation

We are getting into recession. What about my future?

Too many job losses. I am fresher with no experience

When this is going to end?

What can I do in the given situation?

Who can help me? I need some mentoring

Looking back...

During difficult times

Covid : Wait and watch

9/11 : Y2K jobs

2001

2020

2008

Lehman : Low end manual jobs

Why Embedded & IoT are here to stay?

Embedded Systems

Jobs landscape

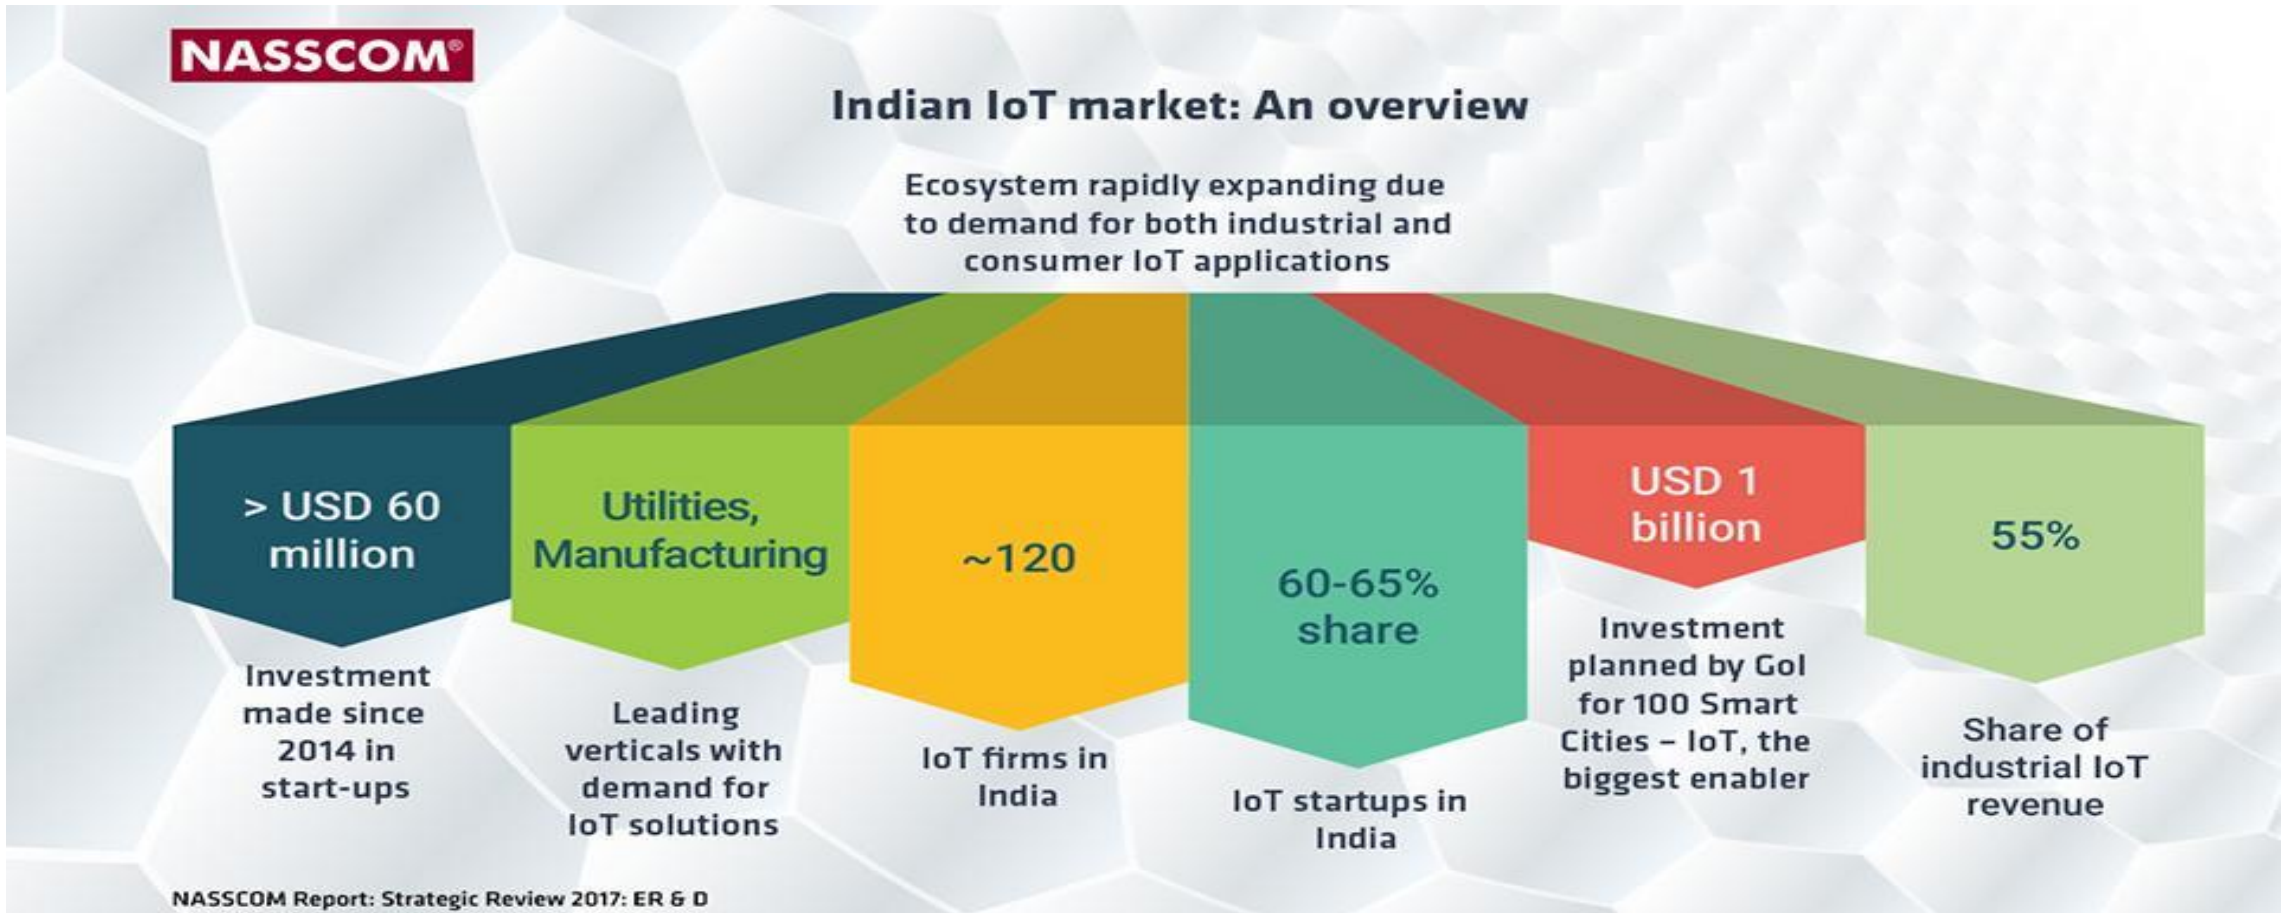

Embedded Systems - Market Size

- Indian electronics market to sized at 400 Billion USD by 2020*
- It is growing at 25% Compounded Annual Growth Rate (CAGR)
- 47.9% of the market spend is going to be on Design & Manufacturing of Embedded Devices
- More than 60% of the devices would require "smart" Embedded Software running in them
- More than 7 Lakhs Embedded Systems jobs available in the market
- Global market size exceeds more than 1 Trillion USD by 2020

Internet-Of-Things(IoT)

Jobs Landscape

- Demand for IoT talent has gone up by more than 300% in the last three years (2014 - 2017) in India*
- There are more than 10 million jobs will be created in the next few years*

Career Possibilities

Career Possibilities

What I will be doing?

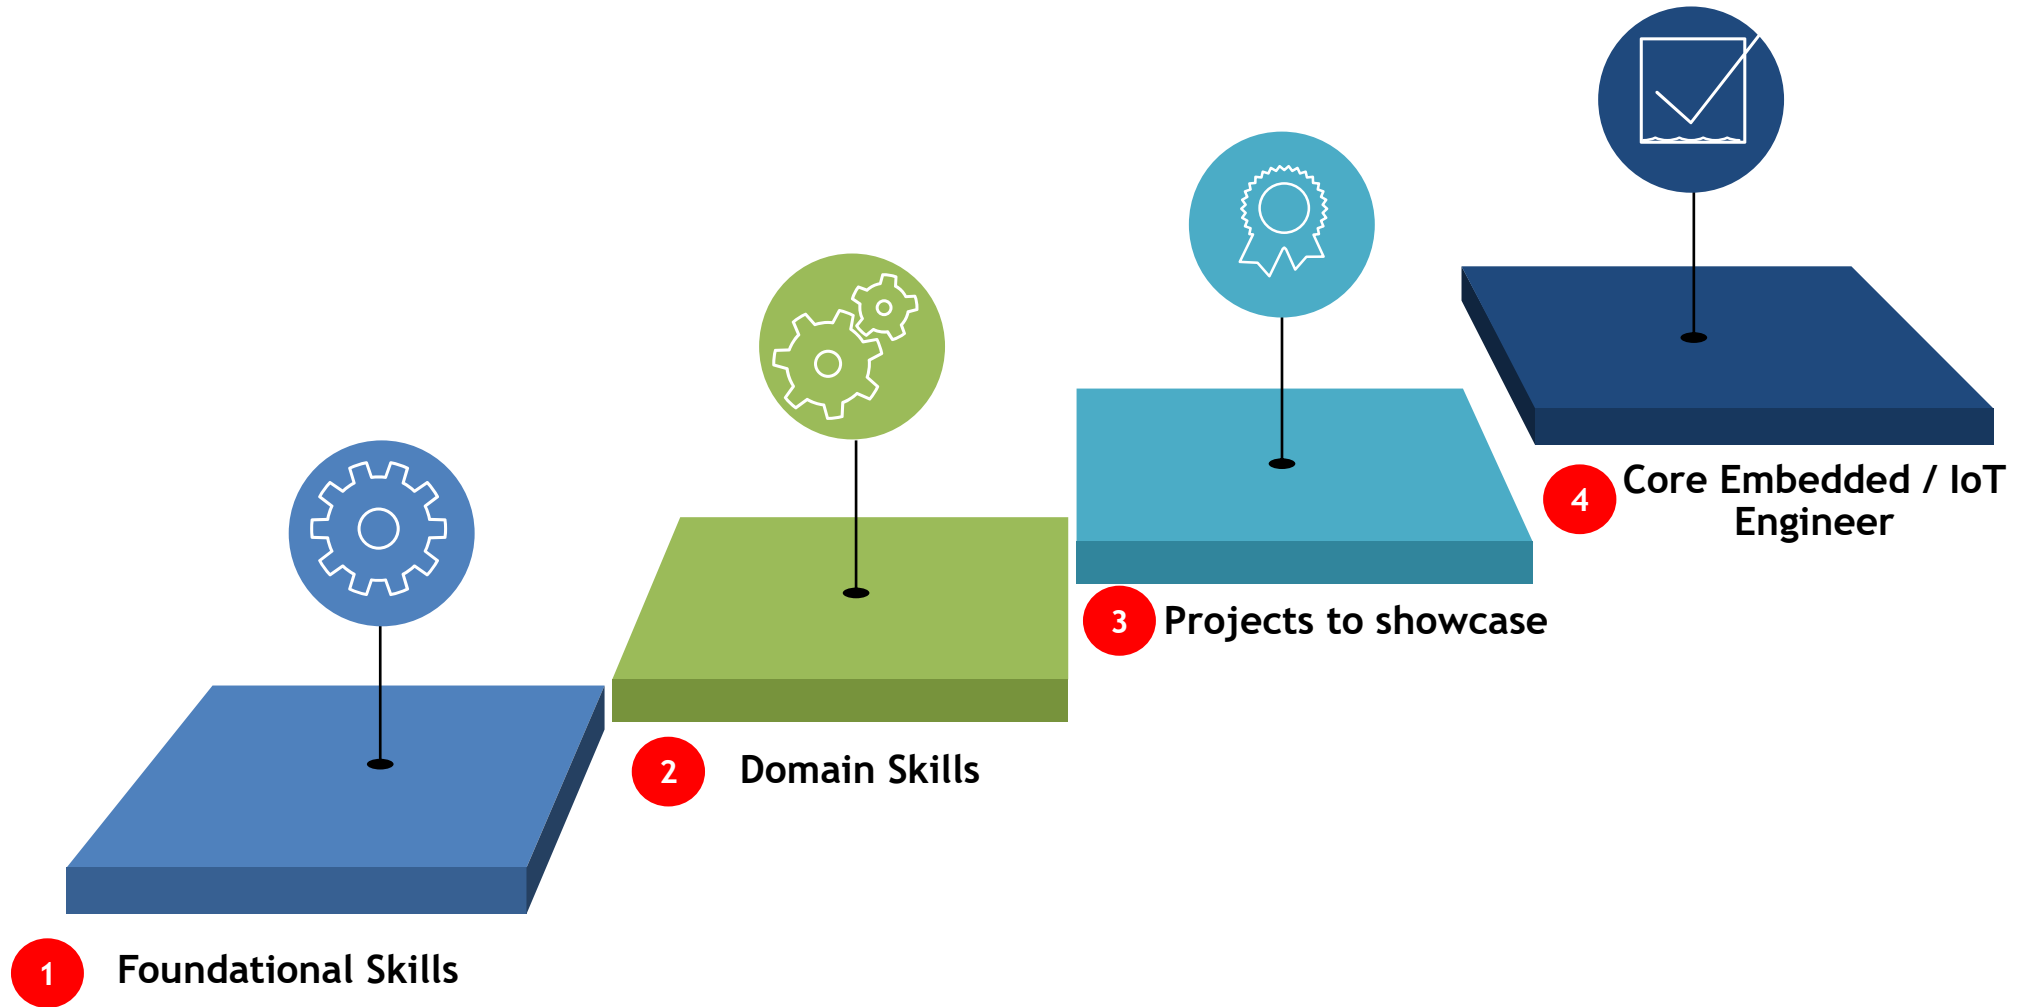

Emertxe Information Technologies, Bangalore

Importance of skill building

ECIP: Transition Journey

Embedded Skillsets

Get-Exposure: Know about Programming / Hardware / OS / Peripherals / Interfacing / Applications / Porting

“Get-hands-on” : Electronics & Embedded

Embedded - Full Stack IoT

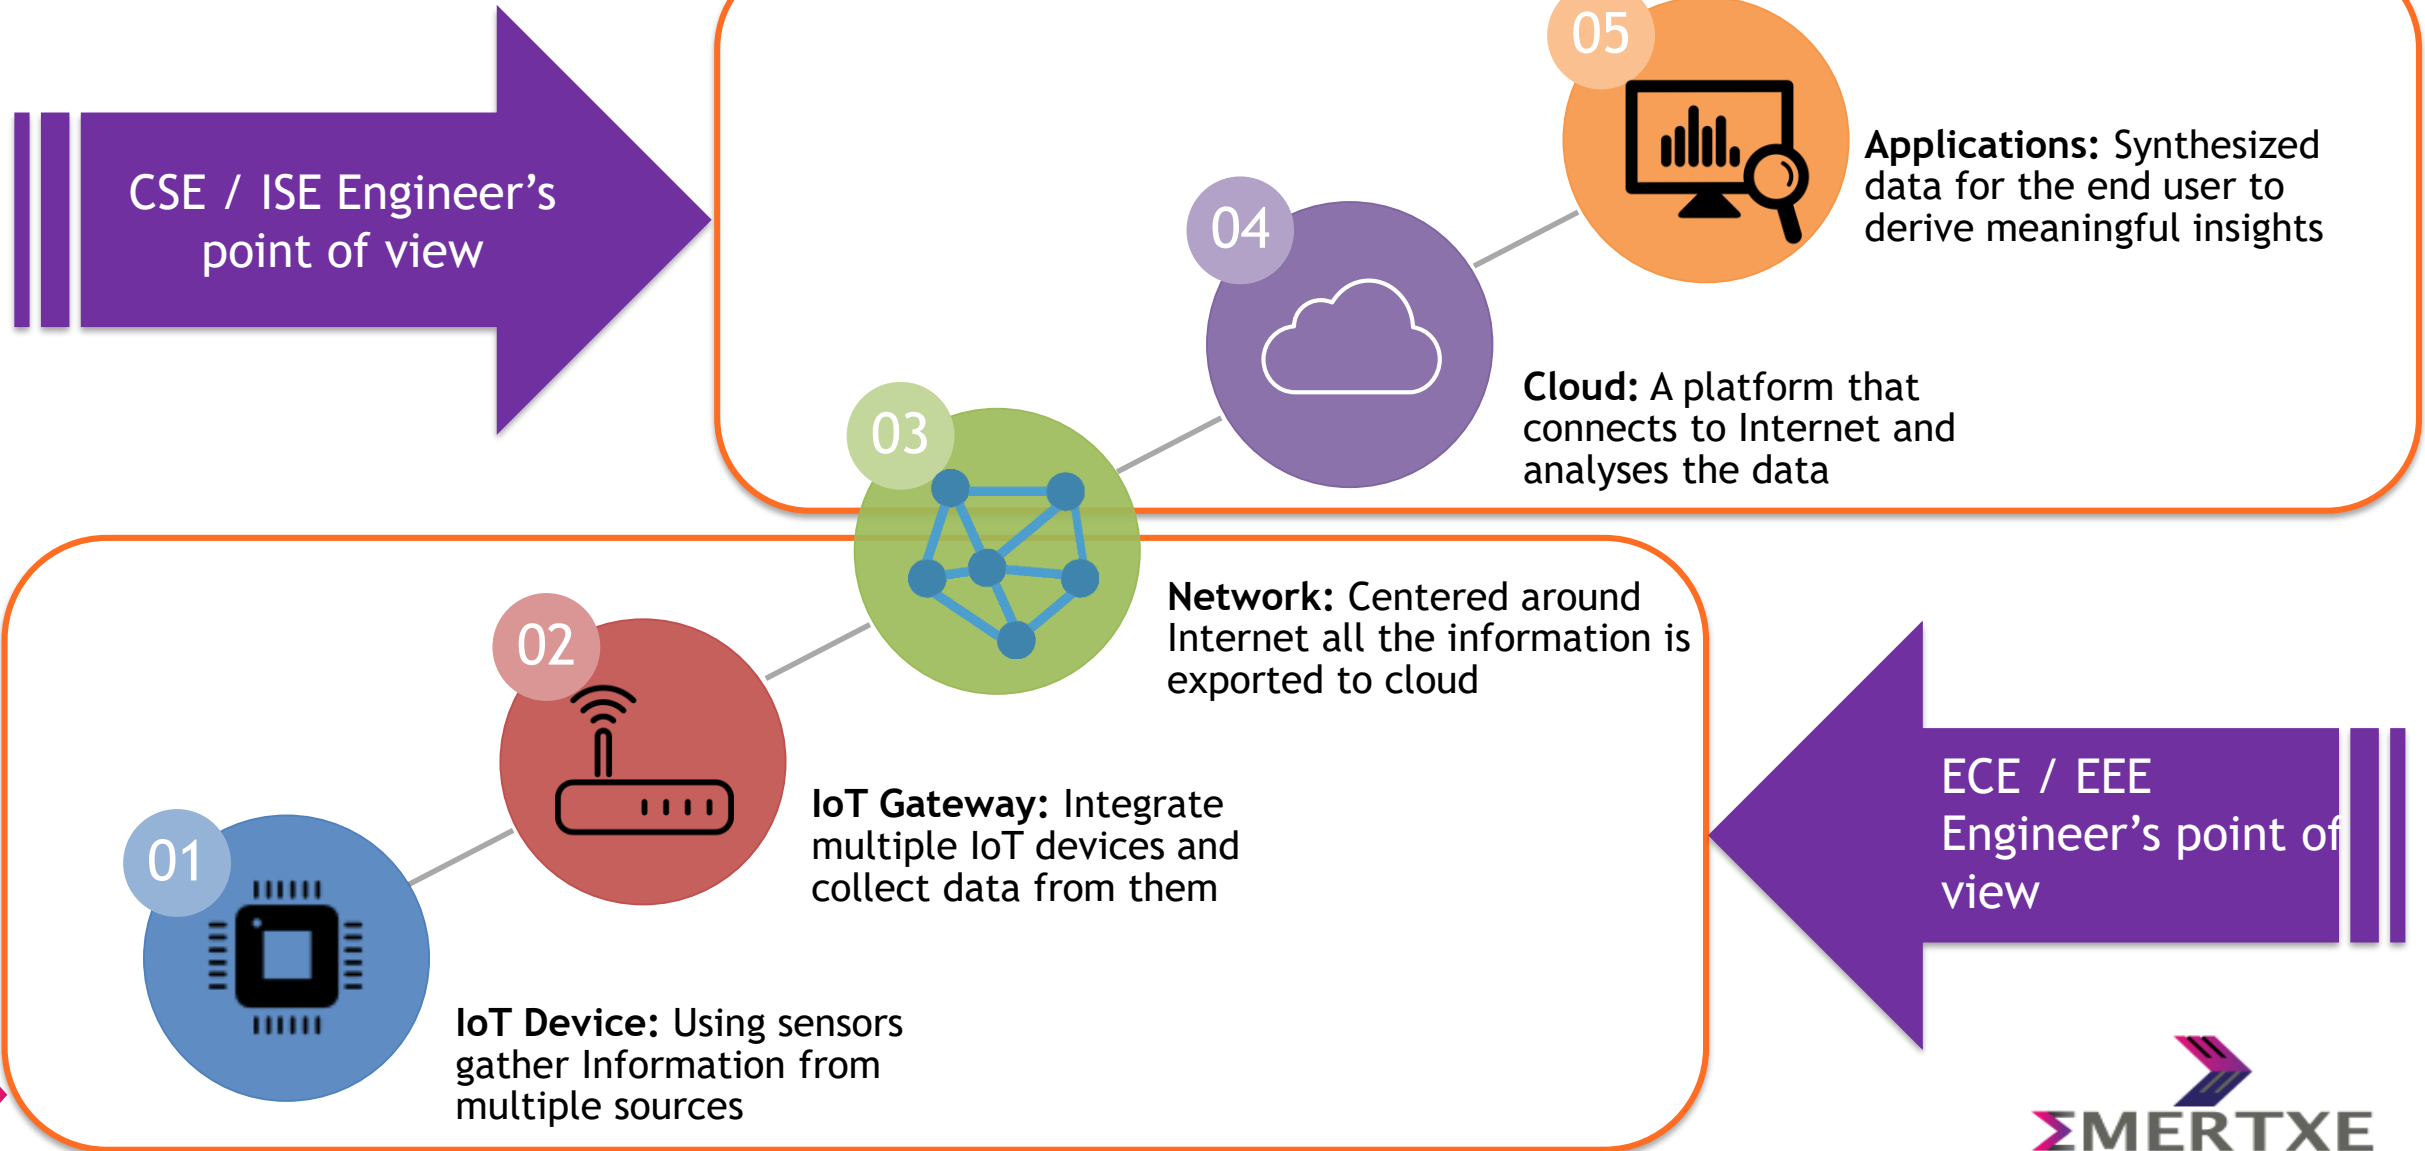

- Linux Systems
- Advanced C Programming
- C++ Programming
- Data Structures and Algorithms
- Micro-controller programming using PIC
- Linux Internals and TCP/IP Networking
- Embedded Linux on ARM
- Programming using Qt

Build YOUR Embedded Portfolio

- Complete Embedded skill-set
- Problem Solving Skills
- 7-8 projects
- Programming and interfacing using PIC MCU
- Multi-tasking Applications using ARM based Linux
- Open S/W (Ex: Linux skills) & Open H/W (Ex: BeagleBone Black)
- IDE / Development tools

IoT components

IoT Skillsets

Get-Exposure: Know about sensor / device / network / cloud / applications

“Get-hands-on” : Electronics & Embedded

Embedded - Full Stack IoT

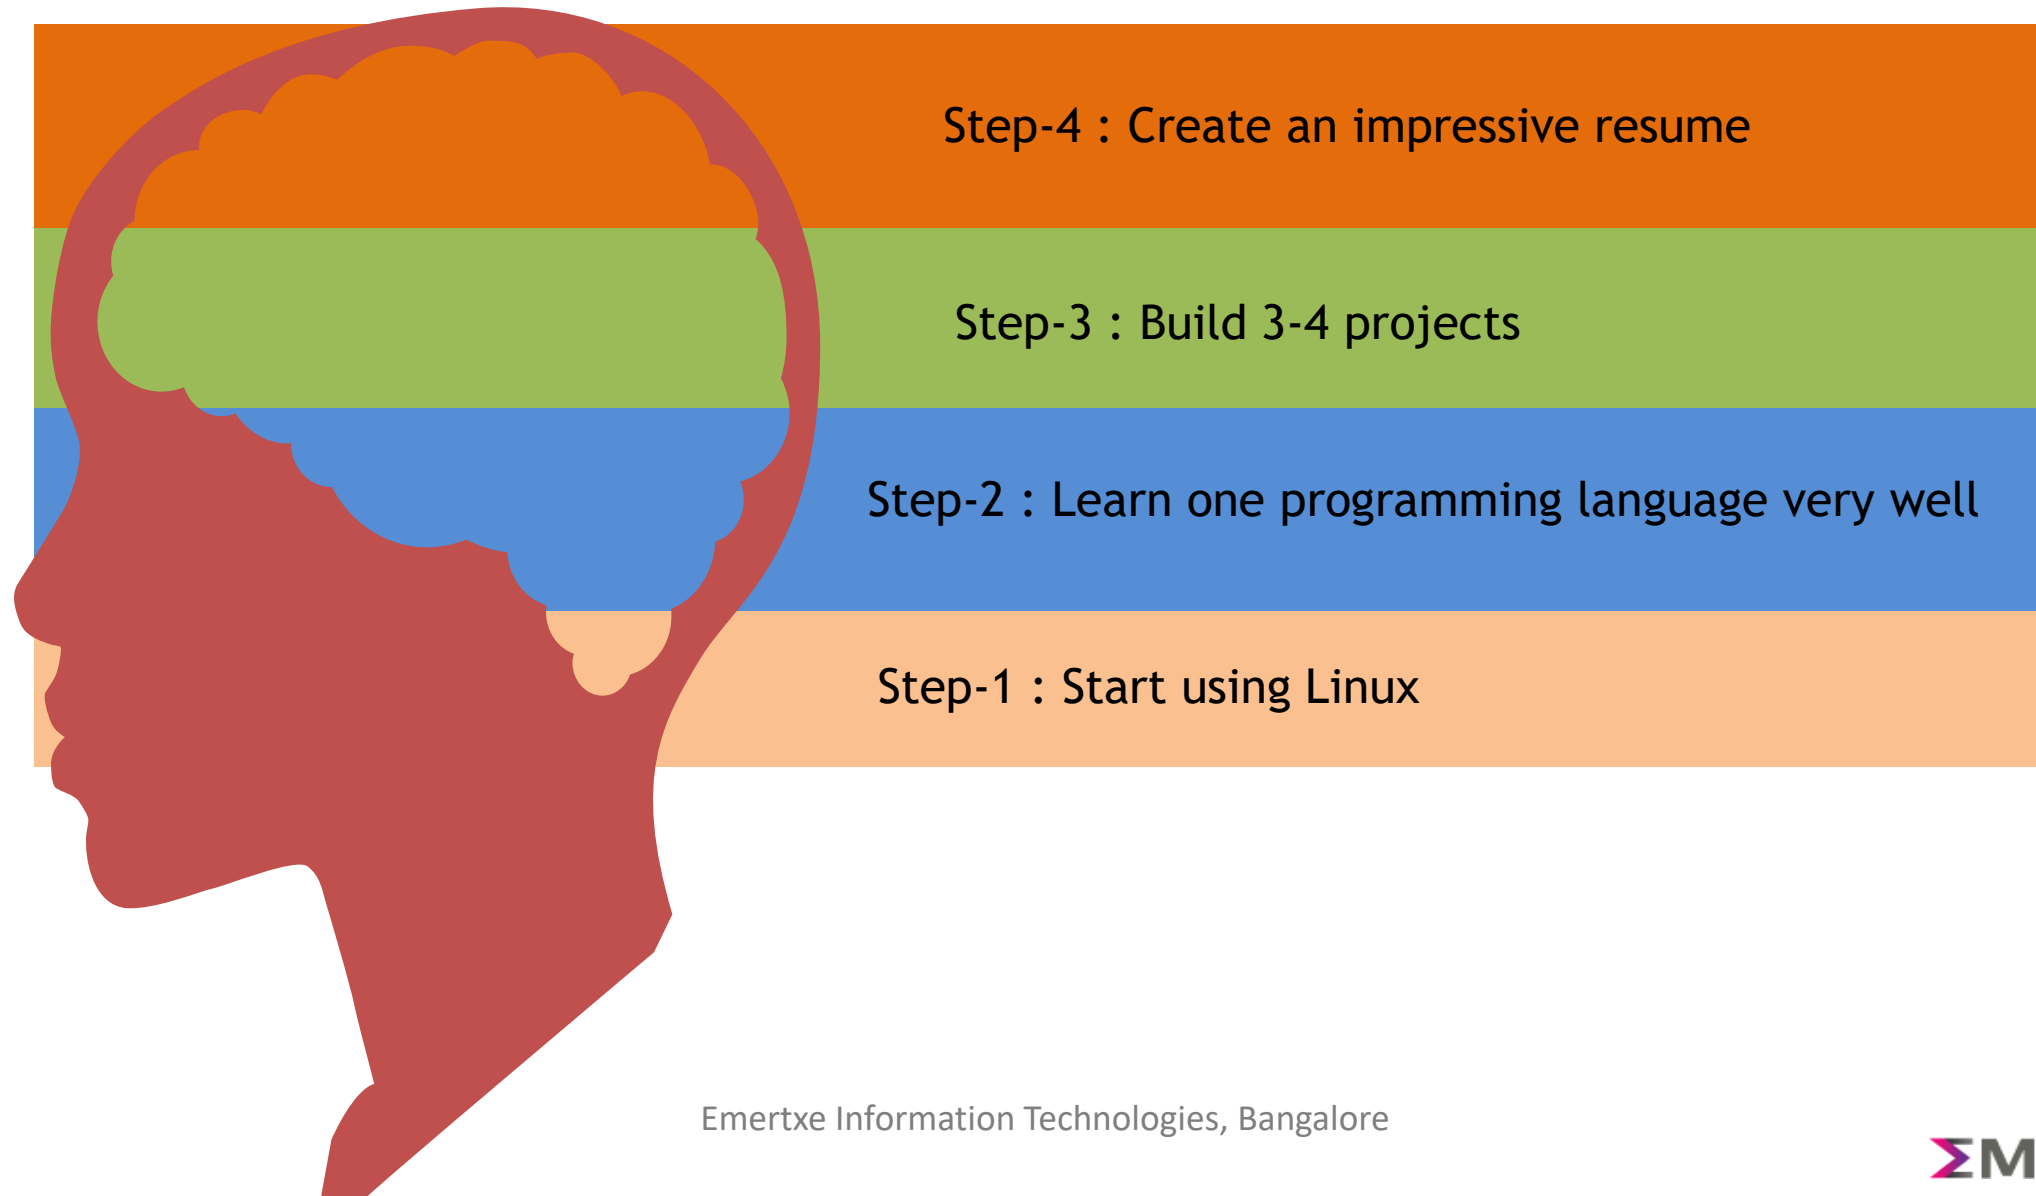

- IoT Architecture
- Setting up IoT workflows
- Advanced C Programming
- Micro-controller programming using Arduino
- Python programming
- Building IoT applications using Raspberry Pi
- IoT Cloud Infrastructure
- Performance and Security in IoT

Build YOUR resume - IoT Developer

- Complete Embedded IoT skill-set
- Problem Solving Skills
- 7-8 projects
- Ability to program a controller / gateway
- IoT protocols & integration knowledge
- Open S/W (Ex: Linux skills) & Open H/W (Ex: Raspberry-pi)
- IDE / Development tools

How and where to start?

How we can help?

1. Awareness workshops
2. Resume building and templates
3. Give demo-workshop of a real-time IoT use-case
4. Access to technical resource library: [Link](#)
5. Access to YouTube channel tutorials: [Link](#)
6. Answer your queries and questions
